LUMINA 20 & 20TD | BATTERY BURNISHERS

LUMINA 20 & 20TD | PRODUCT FEATURES

Engineered for exceptional performance, Minuteman's Lumina™20 and Lumina 20TD Battery Burnishers utilize a 2.5 hp pad drive motor and Minuteman's exclusive patented PAMS® (Passive Air Management System) Dust Control System. PAMS helps to reduce the need for dust mopping after burnishing by capturing finish compound and dust particles. The result —innovative battery burnishers that provide high productivity, solid performance and increased labor savings benefits.

The Lumina 20 and Lumina 20TD feature a 20" burnishing pad with pad driver speeds up to 2000 rpms to give a wet-look shine to floors. These low-profile, ergonomically designed machines feature Minuteman's Multi-Flex® pad driver which adjusts to the highs and lows of the floor while retarding pad growth.

The Lumina 20 and Lumina 20TD battery burnishers are ideal for environments that require a high productivity burnisher such as hospitals, hotels, schools, office buildings and retail stores.

The simplified control panel allows the operator to control pad pressure by using one knob. Raising and lowering the pad driver is made easy with a convenient foot pedal.
